

One Stop Destination for all Pharmaceutical Manufacturing Facility Needs

About Us

Qualitus Pharma Solutions Pvt. Ltd. (QPSPL) is a leading provider of specialized engineering services and end-to-end solutions for the pharmaceutical industry. With a strong focus on innovation, quality, compliance, and client satisfaction, we offer comprehensive support for both Greenfield and Brownfield projects, from concept and design through to successful commissioning and continued operational excellence. Our expertise ensures efficient project execution while meeting the highest international regulatory standards.

We stand out in the competitive pharmaceutical landscape through our client-focused automation solutions, precision custom equipment manufacturing, and thorough validation of equipment and facilities. This unique combination of technical excellence and deep regulatory knowledge establishes us as the trusted one-stop solution partner for pharmaceutical companies seeking reliable, compliant, and future-ready facilities.

Our Verticals

At Qualitus, we are specialized in turnkey projects that transform ideas into fully operational solutions. Our approach ensures every stage, from Conceptualisation, design to execution, commissioning, and handover are handled with the highest level of expertise.

Facility Design

- Conceptual layouts
- Site Master Planning
- Detailed engineering drawing
- Cleanroom design & HVAC integration
- 3D modelling & walkthroughs
- Regulatory compliance (GMP, ISO, USFDA, EU-GMP)

Project Management

- Procurement support & Vendor coordination
- Tendering & BOQ preparation
- 3D modelling & Utility line layouts
- Construction supervision & Technical supervision
- As-built documentation

Automation Solutions

- PLC & DCS systems
- Plant & Process Automations
- Utility Management & integration
- Migration / upgradation of control systems
- Customised reporting (21 CFR Part 11)
- Vision solutions
- Robotic applications

Equipment Supply & Installation

- Filling line & supporting equipment
- Isolator, cRABs & oRABs, VHP Passboxes
- Robot-integrated systems
- Pick & Place systems
- Supporting equipment
- Testing equipment
- Customised equipment

Qualification & Validation

- URS, DQ, IQ, OQ, PQ Documentation
- CSV and C&Q support
- Cleanroom & Utility Validation
- Equipment performance qualification
- Compliance with ISO 14644, ISO 8753, USFDA, EU GMP
